

FinTech Enterprise accelerates its move to a true hybrid cloud experience

The cloud is a key driver of HighRadius Corporation growth and product development. With Nutanix, the company designed a hybrid multicloud roadmap to seamlessly run all its apps and data across any cloud.

Business Challenges

- Improve performance and agility across the enterprise.
- Drive speed of innovation.
- Reduce unnecessary public cloud spending while maintaining performance and scalability.

Solutions

- ✓ Moved critical applications to **Nutanix Cloud Platform**.
- ✓ **Nutanix Files Storage** for centralized data management of 250TB in data in production environment and 200TB in disaster recovery infrastructure.
- ✓ Deployed Nutanix Database Service (NDB) on **Nutanix Cloud Clusters (NC2)** on AWS.
- ✓ **Nutanix Cloud Manager (NCM)** to automate database provisioning and management.

Business Outcomes

1 Enhanced Hybrid Multicloud Strategy

Seamless management

across multiple cloud environments.

2 Optimized Database Efficiency

3X Compression

of storage unlocked additional capacity, driving further cost savings.

3 Faster Time to Market

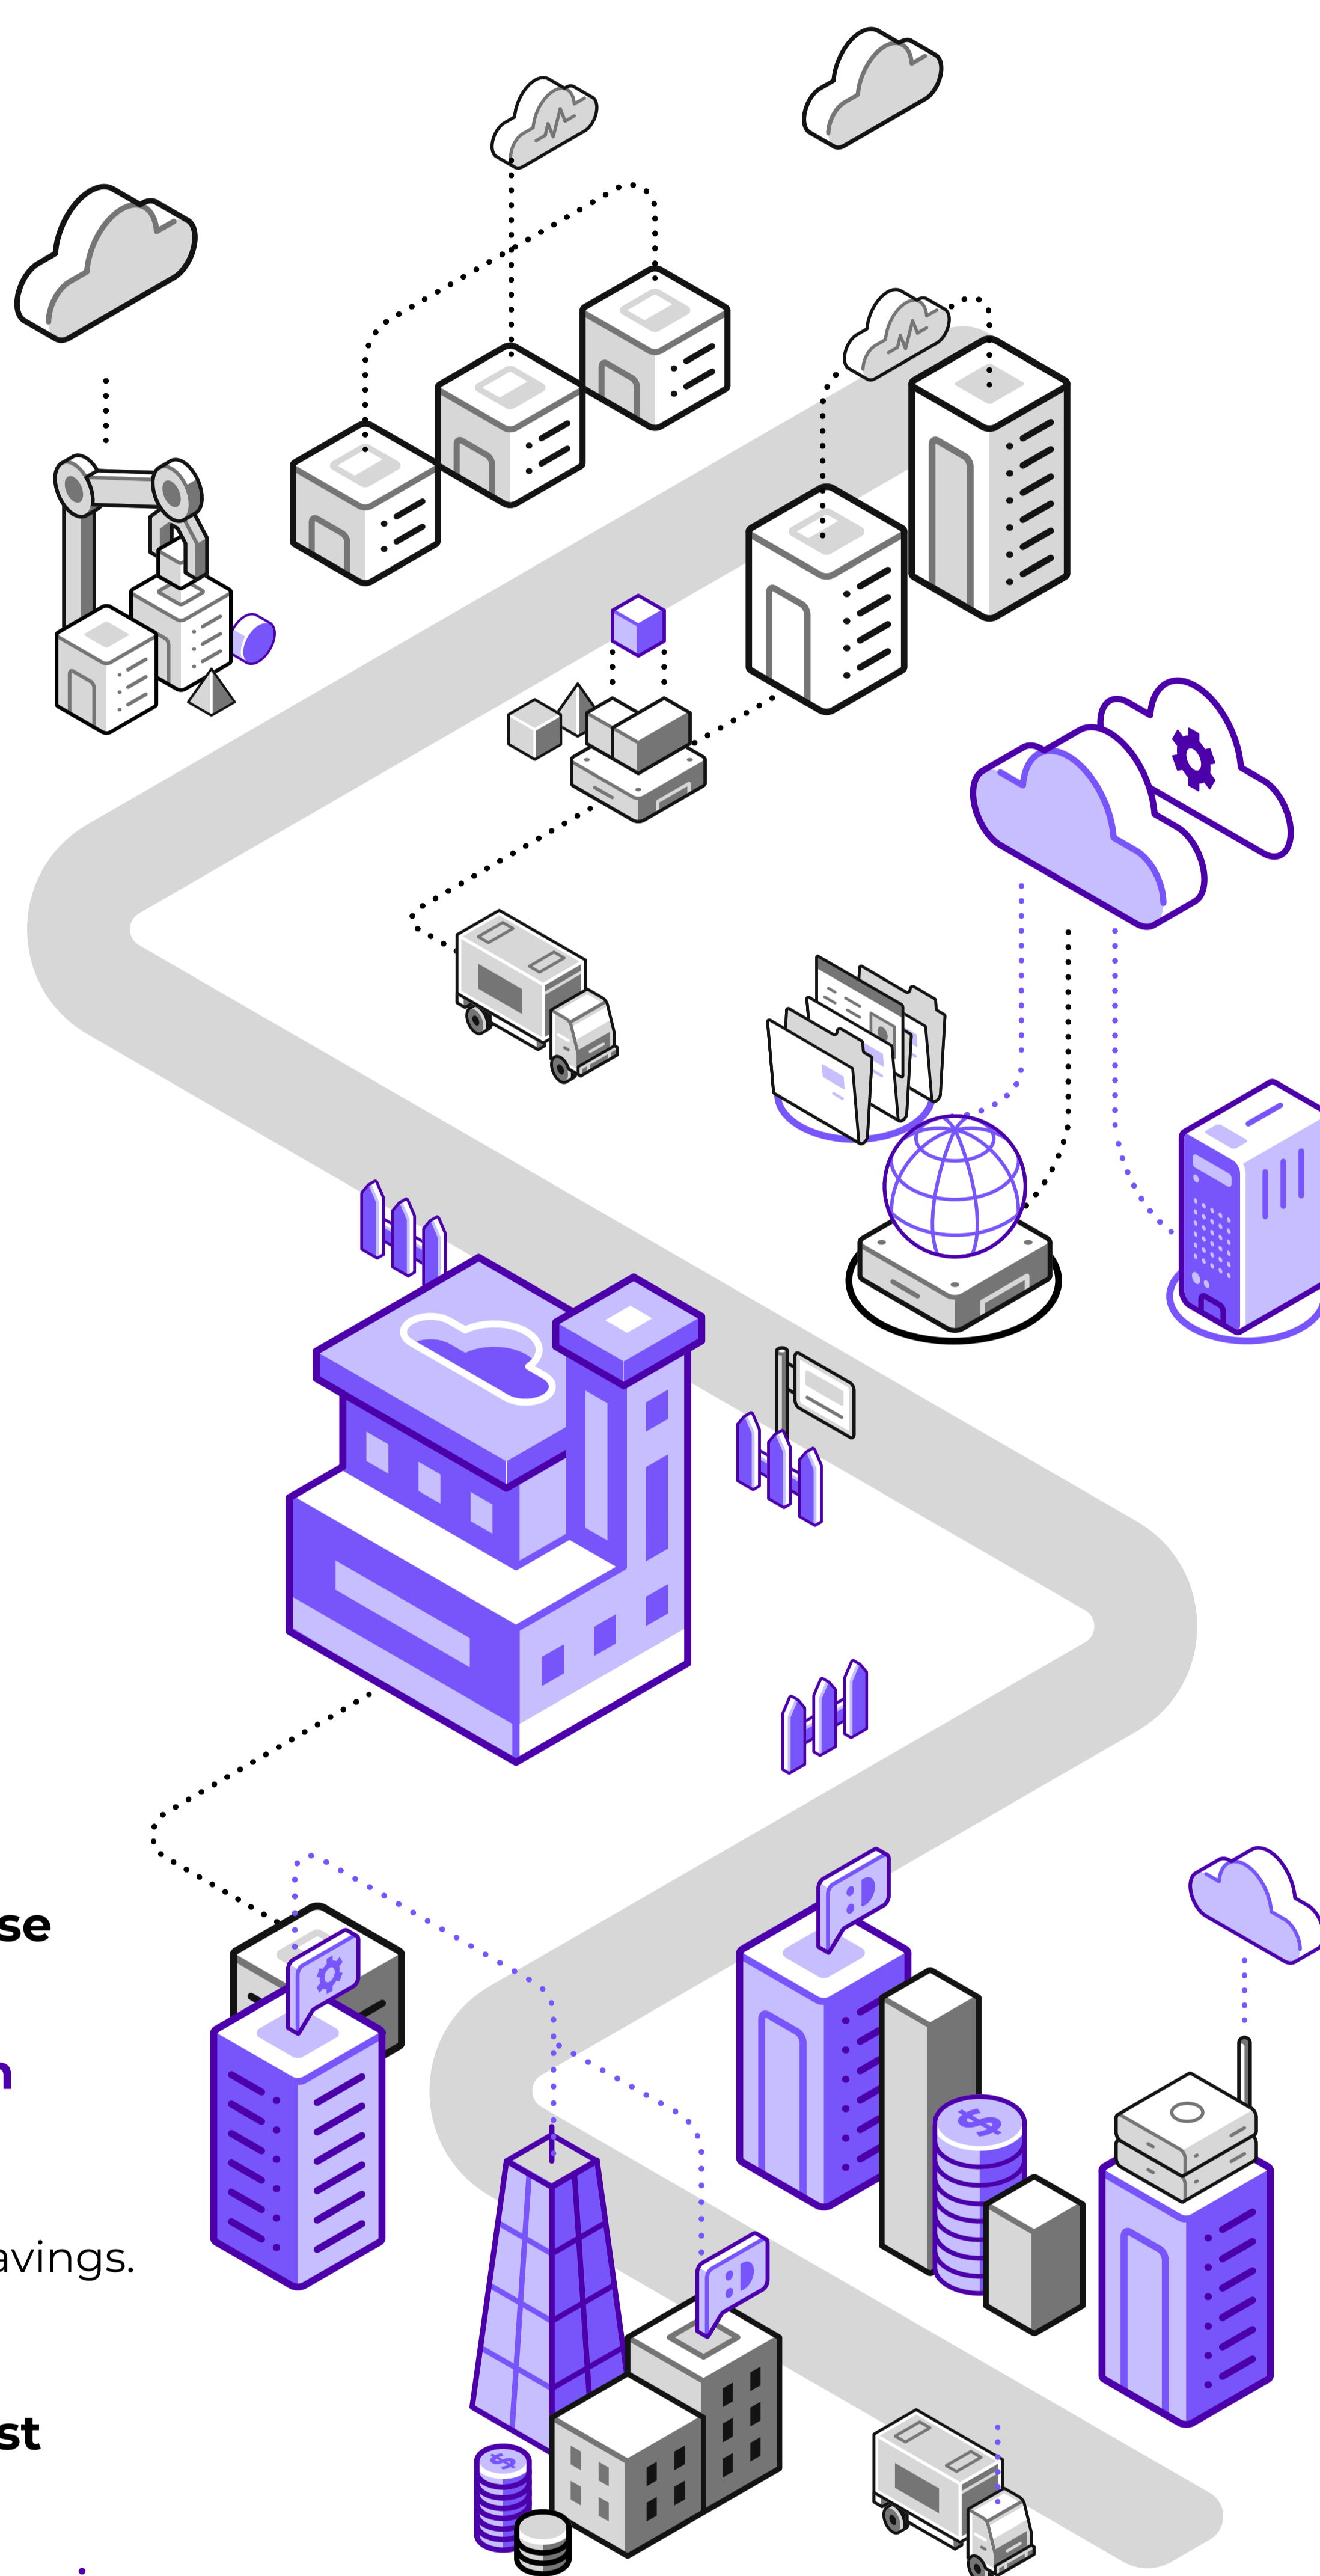

Speed up UAT cycle

UAT: User Acceptance Testing

with improved database stability, faster provisioning and visibility of entire environment.

4 Improved Total Cost of Ownership

Reduced recurring cloud spend by **↓30%**

With Nutanix NC2 solution, HighRadius can drive a hybrid multicloud strategy, avoiding dependency on any single hyperscaler. Nutanix Files Storage also supports our hybrid cloud strategy by offering unified file storage that can seamlessly integrate with various cloud environments.
