NUTANIX

9 Reasons Nutanix is the Right Platform for Your Future

In today's fast-evolving IT landscape, organizations need an innovative platform that is agile, secure, and future-proof. Nutanix delivers a unified, modern platform that offers unmatched enterprise capabilities and simplicity for virtualized and containerized applications, as well as enterprise AI workloads across hybrid multicloud environments. With Nutanix, you are ready for the future.

Be Ready for Hybrid Multicloud

1
Only Multicloud IaaS with Consistent Operations

Manage datacenters, cloud and the edge as a single entity with a true hybrid multicloud platform.

2
Easy License Portability Across Clouds and On-Premises

Optimally locate data and apps across hybrid multicloud as performance, cost, and data sovereignty priorities change.

3
Enabling the Fastest Path to the Cloud

Unified platform to help you move apps faster by eliminating the need for workload refactoring.

Be Ready for Containerized Applications

4
Unified Platform for VM and Containerized Workloads

A single, consistent platform for deploying, managing, and scaling all your apps – traditional and containerized anywhere.

5
Open and Complete Cloud Native Platform

Deploy production ready Kubernetes® within 20 minutes and run them anywhere with comprehensive platform services and integration with the best open-source developer tools.

6
Enterprise Data Services

Snapshot, replication and disaster recovery for containers and VMs across hybrid multicloud environments.

Unlock the Epic Potential of Enterprise AI

7
Simple and Secure GenAI Solution

Validated full-stack enterprise AI infrastructure built on web-scale data services to deploy your LLMs and GenAI apps anywhere.

8
Choice of LLMs and Kubernetes Platform

Create, deploy, and manage APIs and LLMs from NVIDIA NIM and Hugging Face, or LLMs you choose on your choice of Kubernetes platform.

9
Turn Your IT Resources Into AI Resources

Simplicity, choice, and ease of management means IT admins can be AI admins.

Now is the time to deploy with Nutanix.
