

UNLEASH THE POWER OF MACHINE DATA

splunk> | NUTANIX™

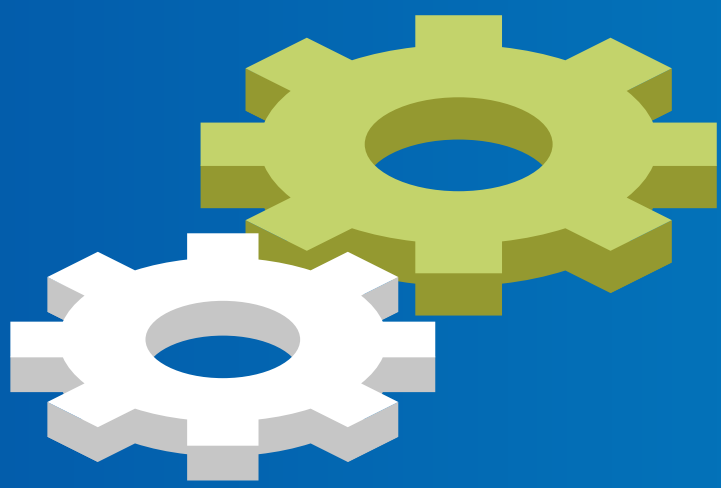

NAME:
James Brown

ROLE:
Solutions Architect
of Data Analytics, AI,
and Healthcare

FAVORITE
RETRO TECH:
Built a gaming system
based on the RetroPie
software to play all the
old school games.

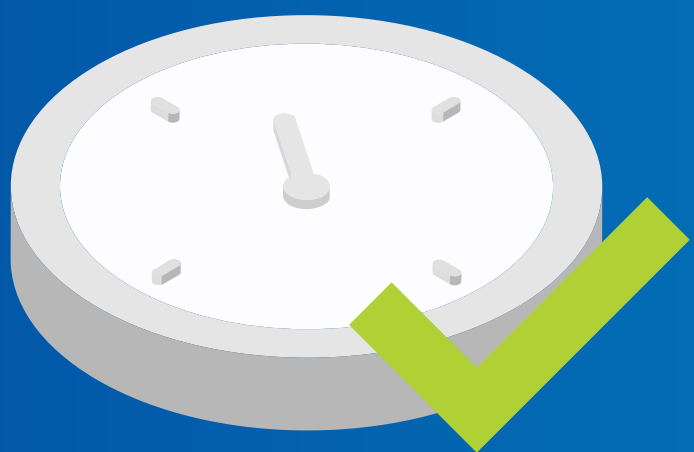

OBJECTIVE:
Wants to ensure
high performance for
I/O-intensive workloads
and maximize the
operational efficiencies
of Splunk.

THE PROCESS

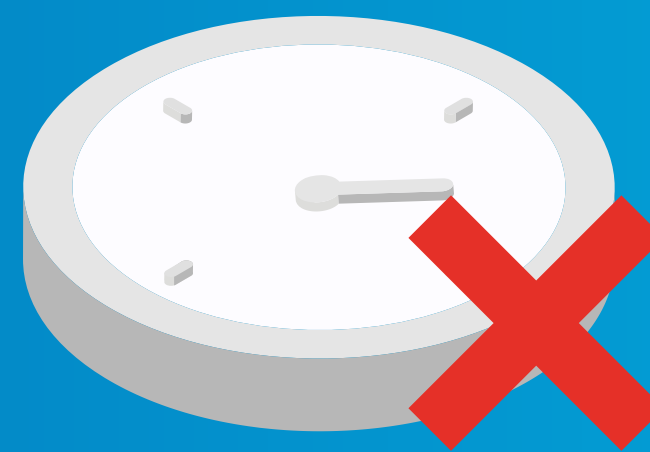

A storage benchmark was executed against the 3 indexers virtualized on Nutanix simultaneously to simulate data ingest and searching.

THE RESULTS

Nutanix completed
successfully in

1 hr

Typical 3-tier
environment still
unfinished after

4 hrs

The Calm script
for Splunk
can deploy:

2
indexers

+

1
master node

+

1
search head

=

in under
7 mins
