NCP Migration and Operations Workshop

Product Code: CNS-NCP-WRK-MGO

At-a-Glance

Stage: Plan

The Nutanix Cloud Platform (NCP) Migration and Operations Workshop is not just about theoretical insights: It provides practical guidance that equips IT teams to successfully migrate to NCP. This workshop is particularly beneficial for the Plan stage of a hybrid multicloud journey and is well suited for complex solutions, including software-defined networking, automation, databases, and end user computing.

Service Scope

Delivered by highly skilled consultants with solid domain expertise and rich experience, the workshop begins with a discovery session to understand the customer's unique operating environment and required outcomes. Critical areas identified during the discovery session are then addressed in a customized workshop.

Upon completion of the customized workshop, IT teams will:
