CentralSquare Records Enterprise

Cut reporting time in half and keep your responders in the field with the most trusted RMS, accessible 24/7 when and where you need it.

CentralSquare Records Enterprise is a web-based solution that allows you to enter data once to share it across 911, CAD, Mobile and Jail. Drastically reduce your data entry and reporting time with an interconnected, full suite accessible anywhere you have a connection. Customize your system to your agency's unique needs, with personalized data-entry screens and layout including dropdowns, labels, validations, workflows and more. As the most comprehensive and compelling NextGen and NIBRS-ready RMS on the market – it manages more of your data needs with the simplicity and ease of 24/7 anywhere access.

KEY SOLUTION BENEFITS

CentralSquare helps deliver end-to-end Mobile Enterprise solutions. Here are main benefits of the solution:

- Cut reporting time in half with reports that can be submitted from the field with web-enabled, full records capabilities
- Refocus IT priorities with a secure, cloud-based solution that handles upgrades and server maintenance for you
- Streamline required reporting with compliancy tools for court, state and national reporting integrations for error-free and faster reporting
- Configure data entry screens to your needs with agency-specific fields and labels and fully customize the way data entry, workflow and reports are generated and exported to meet departmental needs
- With instant alerts and access, your dispatchers and responders can see critical information faster, helping to prevent dangerous situations from escalating further
- Increase the validity of your data with auto-validation data entry that prompts users to correct data that has been omitted or entered incorrectly across 911, CAD, Mobile and Jail

"With Records Enterprise, our officers are spending less time writing reports and researching information and more time in the community where they should be."

– Chris Debbie Chief of the Union County, NJ Police Department

CUSTOMER/PARTNER QUOTE/MARKET REFERENCE

"We use Records Enterprise and if you can imagine it, it can do it. We have were able to eliminate our FTO third-party system by incorporating our field training information in the records system which already has the CAD data, and now also the documentation and approval process all tied together so training officers are able to submit information throughout the day and avoid the 60-90 minutes of reporting time in the office at the end of their day."
– Kathy Bailey, Records Supervisor, NorthGlenn, CO Police Department

"When Northglenn PD switched to Records Enterprise from Intergraph I/LEADS, the officers couldn't wait to switch. The I/LEADS RMS was a very clunky, slow and constantly crashing. When our officers saw some of the Records Enterprise features, especially how quickly they can clear a call and the ease of dragging-and-dropping information into a report which significantly cuts down on typing, they couldn't get on the new system fast enough. The time for a typical arrest used to take 25 to 30 minutes if the system was working properly, and now some of our guys can complete it in five minutes. They do most of their reporting from their cars now too with the web-based system."
– Todd Fields, IT Coordinator, NorthGlenn, CO Police Department

ABOUT CENTRALSQUARE TECHNOLOGIES

CentralSquare Technologies is an industry leader in public safety and public administration software, serving over 8,000 organizations from the largest metropolitan city to counties and towns of every size across North America. CentralSquare's broad, unified and agile software suite serves 3 in 4 citizens across North America. The technology platform provides solutions for public safety, including 911, computer-aided dispatch and records management. For public administration agencies, CentralSquare provides software for finance, human capital management, payroll, utility billing, asset management and community development.

ABOUT NUTANIX

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale.
