Wipro's ROBOaaS (ROBO: Remote Office & Branch Office)
Powered by Nutanix

Transform your remote offices into mini data centers while enjoying tailored enterprise class performance, services and significant cost savings.

ROBO1.0 aims to address new demands that are growing with more field-based IT infrastructures; need for processing power in proximity to the point of data collection and challenges related to lack of power and space.

Another issue is maintenance of expensive skilled resources and remote management. The solution can provide a tactical approach to these issues by designing and delivering fully managed enterprise class solution at the point of requirement.

Redefine the possibilities with ROBO1.0, by lowering physical footprint, complexity, and easing manageability while enjoying the performance of mini data centers.

Key takeaway

- Eliminate IT infrastructure cost, complexity and the need for specialized personnel in remote and edge sites using web-scale technologies.

- Run Citrix XenDesktop and XenApp, and all remote office's local applications such as SQL server, exchange, custom applications.

- Operate all essential services including Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), file and print, WAN (wide area network) optimization, and security-focused virtual appliances.
- Capitalize on flexible consumption models and avoid situations arising out of forecasting such as sunk costs or inadequate performance and capacities.

Key benefits

A robust and reliable solution, ROBO1.0, is built on a solid foundation that amalgamates decades of Wipro's service delivery experience and the strength of Nutanix hyper-converged infrastructure. This foundation delivers benefits spanning across 360°.

The Wipro touch:
Proven services record maintained and delivered by experts

Flexible:
Custom built consumption and deployment models, aligned to business expectations

Integrated service model:
End-to-end seamless integration ranging from consulting to digitalservices

Freedom:
Choose from preferred partners or go ahead with a software only deployments

Density improvement:
Consolidate workloads and improve efficiencies of the underlying IT estate

Performance driven, secure, scalable, Plug and play, and a true "Branch in a box" experience leveraging Wipro's ROBOaaS powered by Nutanix"

Key features

- One-click simplicity: Leverage machine learning to reduce complex IT tasks like upgrades to a single click and lessen your dependence on IT specialists.

- Centralized analytics: Aggregate health and usage statistics across multiple sites, with ability to zoom into individual location.

- Network visualization: Get a visual representation of network connections & traffic flows.

- Built-in data protection: Integrated data protection and disaster recovery capabilities for protecting remote applications, VMs and data.

- Cloud connect: Connect to the cloud and use it for data management and for disaster recovery.

Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO) is a leading global information technology, consulting and business process services company. We harness the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help our clients adapt to the digital world and make them successful. A company recognized globally for its comprehensive portfolio of services, strong commitment to sustainability and good corporate citizenship, we have over 175,000 dedicated employees serving clients across six continents. Together, we discover ideas and connect the dots to build a better and a bold new future.
